**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

The principal of American business is to leave the market open for free competition. I choose Sonic instead of the big communication corporations because they provide great, reliable and competitive service. FCC should provide more means for the small business and encourage small business in every market. The Broadband service is not important but critical for Americans, for business and residence because more household products are rely on the broadband service. Most of the household now is on the cross road to get wider spectrum in order to cover all the products, from security, appliances to entertainment. A free competition market can provide more affordable broadband service for everyone.

My second home has only one provider, AT&T, because of the rural environment. We are unable to get true broadband services. If we can get a true broadband service, we can install security cameras in our house, water level sensor to monitor our domestic water tank water level so we will not run out of water.

Please leave the market open for competition. Let the new American Entrepreneurs can create their American Dream, that is the American Value.
